SOSAZ Network
2025 Education Roadshow

Get The Facts!

- Over 90% of Arizona families choose public schools
- AZ public schools remain 49th in the US in per-student funding, which results in low teacher pay, high class sizes, and reduced academic opportunities for students
- AZ is $5.5 billion short of the national average in annual per-student spending
- AZ schools have desperate funding needs: extracurriculars, counselors, school facilities, aides, technology and more

Vouchers Hurt Arizona's Public Schools

- Vouchers are projected to cost Arizona taxpayers over $1 Billion in 2025
- Siphon desperately needed dollars away from underfunded local schools
- Zero accountability or transparency of taxpayer funds
- Rife with misuse and mismanagement

Vouchers are Unequal & Discriminatory

- Public schools accept and serve all students, regardless of income, ability, or background
- Vouchers are really the "school's choice" — many private schools pick & choose their students
- ESA vouchers erode and defund the choice of AZ families who choose their community public schools
- Approximately 3/4 of ESA voucher funds go to kids who were already choosing private school or homeschool
